A dark red square containing the lowercase letters 'pb' in white.

Summary

I am a Full stack Javascript Developer specializing in the MEAN stack comprising of MongoDB, Expressjs, Angularjs and Nodejs. I code full stack apps and solve problems using javascript. I also specialize on copying features from other websites and integrate in my own.

Experience

Learning Assistant, Southeast Missouri State University

Cape Girardeau, MO — 2013 - 2014

I was part of a team of tutors who helped students on different subjects they needed help on. I particularly specialized on helping students with maths.

Accomplishments

- Tutored students who were struggling in their maths class and helped them grasp the material better
- Tutored 10 - 20 students a week working 10 - 20 hours per week
- Helped students become independent learners by providing them better understanding of the fundamentals of the subject matter
- Covered college algebra, pre-calculus, calculus I, calculus II

Education

Southeast Missouri State University

Computer Science — 2011 - 2015

Coding House

Full stack Javascript — April 2016 - June 2016

- Spent 14 weeks learning javascript web development using the MEAN stack.
- Built full stack CRUD applications using web development skills such as
 - Web design
 - User management
 - Social Login
- Used cutting edge technologies such as
 - MongoDB
 - Express Js
 - Angular Js
 - Node Js
- And collaborated in teams to create group projects using Git and Github.

Skills

- Holy trinity: HTML, CSS, JavaScript
- Frontend: jQuery, AngularJS, Ionic

- Backend: Node, Express, Socket.io, Mongoose
- Database: MySQL, SQLite, MongoDB
- Other: Gulp, Mocha, Chai, Karma
